

MAPS

Michigan Automated
Prescription System

Accuracy of Data

- Edits applied. Most at 95%
- Two full time technicians.
- Two part time students.
- Full time analyst
- One shared tech and PT programmer.
- Data uploads at FTP and within MAPS.
- On Line corrections.

Upgrades

- Most now 2005 format.
- Adding small pharmacies by August 2009.
- On line Law Enforcement access for patients.
- Files approved after user assigned.
- Files in PDF or Excel format.
- Adding DEA files later in the year.

How is the MAPS Information Reported?

**The dispensing information
must be reported in ASAP
(American Society for
Automation in Pharmacy)
Upgrading to 2005 format
includes method of payment**

Patient Identifier

All of the following:

Full name

Address including zip

Date of Birth

**Any one of the following: Michigan DL
number, SOM ID, Zeros (under 16)**

R 338.3102(g)

- “Positive Identification”
- Means identification that includes a photograph of an individual in addition to his or her date of birth. Positive identification shall include an identification card issued by a governmental agency, provided the identification card meets the requirements of this subrule.

Rule 338.3162

Positive ID required when pharmacist or pharmacy employees do not know the person controlled substances are dispensed or delivered to. Includes a photograph. The pharmacist and the pharmacy are responsible for compliance with this rule.

Chain pharmacies created signs and policies. Positive ID usually is the drivers license. There are exceptions

Patient or caregiver unwilling/unable to provide identifier.

- Prescription may still be dispensed if pharmacist uses professional judgement.
- Pharmacist shall not dispense prescription if conditions under 338.490(2) exist.
- Improperly written, multiple interpretations, may cause harm to patient, used for other than legitimate medical purposes.

Pharmacist professional responsibility

Rule 338.490 prohibits pharmacist from dispensing prescription if: Prescription appears improperly written, multiple interpretations, possible harm to patient, non-legitimate purpose.

«Company»
«FirstName» «LastName»
«Address1»
«City», «State» «Postal Code»
Dear «Title»:

The Michigan Automated Prescription System (MAPS) program has identified your patient «Patient», «DOB», «Address2», who appears to be seeking treatment from multiple physicians and obtaining controlled substance prescriptions of a similar nature from these practitioners.

It is suggested that you obtain controlled substance prescription data on the patient identified above and communicate with other health care providers who are treating this patient. You may access MAPS data via a link on our website at: www.michigan.gov/healthlicense and click on the MAPS link. Enclosed please find a listing of physicians in Michigan that provide an office based treatment program for opiate addiction that may be shared with the patient. There are other options available in addition to opiod treatment such as referral to a pain specialist, or requiring the patient to enter into an agreement which limits their treatment to a specific physician and pharmacy. Please consider all of the options that are available to you and your patient.

If you have any questions or need additional information, please contact our office at the phone number listed below, or at our e-mail address: mapsinfo@michigan.gov.

Sincerely,

Bureau of Health Professions
Health Investigation Division
(517) 373-1737

MAPS REQUESTS 2008

>300,000

CURRENTLY AVERAGING

> 1200 DAILY 24/7

30,000/month

OVER 99% ON LINE

Hydrocodone 2008

- Total of 5,161,390
- Increase of 5.14%
- *Hydrocodone now accounts for 29.9% of all controlled substance prescriptions.*
- *Increase every year since 2005*

Suboxone 2008

- Suboxone 2008: 151,104
- Increase of 65.9%
- Patent expires late 2009

Protecting yourself

- Limit number of staff allowed to telephone controlled substance scripts.
- Secure controlled substances in office.
- Don't leave RX pads out. Security paper ???
- Consider not placing DEA number on RX pads.
- Do not sign blank prescriptions
- Don't prescribe cs for self or family.
- Don't write cs script for "office use"
- Law requires that prescriber ask patient about cs use and record response in medical record.

Protecting patients

- Respond to “red flags”
- Use MAPS
- Keep accurate records
- Consider contract, urine screens for chronic cs patients
- Avoid Vicodin type analgesics for chronic pain patients.
- Be aware of problems associated with methadone

Prescribing controlled substance for self or family.

Long term prescribing of controlled substance considered by experts to be below minimal standards. Short term or emergency deemed acceptable. May cause concern for pharmacist.

Health Professional Recovery Program

• Health Professional Recovery Program

The Health Professional Recovery Program (HPRP) was established by the Legislature in 1993 as part of a disciplinary reform effort. The HPRP is a confidential, non-disciplinary program designed to assist licensed or registered health professionals recover from substance abuse/chemical dependency problems or a mental health problem.

The toll-free number for the HPRP is 800-453-3784.

The next HPRP meeting is scheduled for Monday, December 17, 2007, at 9:30 a.m. in the Ottawa Building, UL Conference Room 4.
